

# Trash Container Design

When purchasing containers that will be picked up and emptied by the City of East Peoria please ensure that the container is designed to be picked up by semi-automated trucks. The images below give a rough idea of what the container should look like.

Note the curvature of the container. This is designed to allow for gripping of the mechanical arm.

96 gallon - Large  
Holds 8-9 trash bags

64 gallon - Medium  
Holds 5-6 trash bags

48 gallon - Small  
Holds 2-3 trash bags

Container must have pick-up bar.

Ensure you are purchasing a solid built container that will take abuse. Do some homework and search the internet. Many durable containers come with 5-10 yr. warranties. Once you purchase a container; ensure you save the receipt and company information for future reference.
